Report of Original Project in Japan

Japan Down Products Corporative Association
By Junya Kuroyanagi

JDFA Project in 2024

1. Alkylphenol Ethoxylates (APEOs)

APEO regulations have begun in many countries.

There are test methods (such as ISO18254-1, GB/T14272), but there are problems in that the test results vary.

We will begin considering testing methods for down and feathers.

2. Down Power (Fill Power)

We restart the verification of the test method about down power.

We will present our progress at the Next meeting.

Thank you.
